Placement by Domain

Test results indicate that Ada would benefit from review of pre-K skills and concepts related to quantitative reasoning and modeling. Instruction that connects counting patterns with addition and subtraction concepts will strengthen Ada’s math abilities across domains. This priority places Ada in Instructional Grouping Profile 2.

Number and Operations

● Early K
367

Developmental Analysis

At placement levels K-2 this domain addresses counting, the base-ten number system, and the operations of addition and subtraction. Test results indicate that Ada may be ready to develop skills related to counting up and back, and basic addition and subtraction.

Algebra and Algebraic Thinking

● Emerging K
360

Developmental Analysis

At placement levels K-2 this domain addresses skip-counting, fact families, and using equations to solve addition and subtraction problems. Test results indicate that Ada would likely benefit from instruction to develop basic concepts of part-part-whole relationships, leading toward early addition and subtraction concepts.

Measurement and Data

● Mid K
378

Developmental Analysis

At placement levels K-2 this domain addresses the concept of measurement units, especially for length and time. It also includes showing data on simple graphs. Results indicate Ada may be ready to develop a basic understanding of comparing and sorting objects by measurable attributes, such as length and capacity.

Geometry

● Emerging K
354

Developmental Analysis

At placement levels K-2 this domain addresses attributes of basic two- and three-dimensional shapes, relationships between shapes, and simple geometric terms. Test results indicate that Ada would likely benefit from practice identifying basic shapes and their attributes.
