

NOVEMBER CONFERENCE

2025

ADA

SEL	Glows : Ada is inclusive, playful, caring and flexible. She also has the courage to solve math problems on the board and share out during Circle Time. Ada feels closest to Mateo ("my best friend"), Soren, Ladon, Yosef and Clara. Together, they like to run and climb at recess and play Stacrobats during Choice Time. Grows: Ada is working on choosing spots where she will be successful and showing whole body listening during lessons. Resource: Kelso's Choices Poster
LITERACY	iReady Fall Reading Diagnostic: Ada received a score of 381 (Early K), placing her in the 90th percentile nationally. Glows: Ada can identify 26/26 capital letters, 25/26 lowercase letters, produce 24/26 letter sounds and read 40 sight words! She can combine and count syllables, point out beginning and ending sounds and blend phonemes in 3-letter words. Ada has also made strides in her writing and now includes punctuation, labels, sight words and words she has sounded out. Grows: Ada would benefit from extra practice around distinguishing between letters l and i, and producing the remaining letter sounds (e is /e/ instead of /i/, and l is /l/ instead of /luh/). Also, recognizing and producing rhyme ("Do __ and __ rhyme?" and "What words rhymes with __?"). For writing, let's continue transitioning to lowercase letters, phoneme segmentation (i.e. dog is d-o-g) and adding finger spaces between words to improve legibility. Resources: • Alphabet Chart & Letter Formation Practice • Letter & Sight Word Flash Cards • Login for iReady Reading & Epic!
MATH	iReady Fall Math Diagnostic: Ada received a score of 365 (Early K), placing her in the 68th percentile nationally. Glows: Ada can now count by 1's to 119 (+14) and 5's to 20. She can recognize most 2D shapes in different orientations and variations, and identify 20/20 numbers. Ada can both accurately and efficiently find the total using the cross off, scoot and count on strategies. Ada can also solve addition and subtraction problems using manipulatives, drawings, fingers and mental math. Grows: Let's focus on crossing the decades when counting by 1's ("119, 2000"), and skip counting by 5's and 10's to 100. Also, recognizing the 2D shape pentagon. Resources: • Number Chart & Number Formation Practice • Number & 2D Shape Flash Cards • Login for iReady Math
